

Final event of the European COST action TU0801

Semantic enrichment of 3D city models for sustainable urban development

Usage, Usability, and Utility of 3D City Models

October 29 - 31, 2012 - Nantes, France

Organized by the **cerma** lab, Graduate School of Architecture

► Objectives

To assess the Utility and Usage of new 3D City Models (dedicated to the development of the sustainable city).

To coordinate corresponding research activities.

To develop perspectives for future calls for european research projects.

► Target audience

Producers and users of 3D city models, operators and decision-makers directly interested in usage and utility motivations, concerning urban spatial models.
